

Homeschool Science Enrichment Program

Phinizy Center for Water Sciences...
providing quality educational experiences to students since 1998!

For more information or to sign your child up, please call our education department at 706.796.7706 or visit us online at phinizycenter.org/homeschool.

Phinizy Center for Water Sciences
1858 Lock and Dam Road
Augusta, Georgia 30906

Phinizy Center is a 501(c)3 nonprofit organization 706.828.2109

Our homeschool program has been developed with your family's needs in mind. We have broken the program down into two separate semesters consisting of five sessions each. Each session will be held on a Monday from 10:00 a.m. - 12:00 p.m. starting in August and running through May. We also invite you to bring a picnic and join others at the picnic pavilion for lunch following sessions.

The cost is \$40.00 per student for the five week semester. You may register for one semester at a time or for both semesters at once.

Due to space limitations we can't guarantee a place for your child until your payment has been received. Payment may be made by cash, check or credit card. Deadline for registration is one week prior to each session.

REGISTRATION:

Parent's Name _____

E-mail _____

Phone _____

Name(s) of Student(s) _____

Semester(s) _____

Age of Student(s) _____

Full registration & payment available online. You may also mail this registration in with a check made out to Phinizy Center or send us your credit card information.

Card Type _____ EXP. _____ CVC # _____

Card Number _____

The Phinzy Teaching Philosophy:

To inspire passion and appreciation of the natural environment and to provide knowledge and tools needed to maintain a healthy urban watershed.

We believe this is best achieved through active, hands-on learning that engages students and encourages them to search for scientific solutions to environmental problems. Research has shown that outdoor education has a unique potential to inspire excitement about learning.

HOMESCHOOL SCHEDULE
AUGUST 2016 - MAY 2017
10:00 a.m. - 12:00 p.m.
 Group 1: 2nd Monday Each Month

JANUARY	Snow Birds
FEBRUARY	Furry February
MARCH	Froggy Frolic & Turtle Tantrums
APRIL	It's a Buggy World
MAY	Fishy Graduation

HOMESCHOOL CURRICULUM SUBJECT OVERVIEW

Our educators have designed a unique program for children and youth who are in kindergarten through 12th grade. All field trip subject matter will be age and developmentally appropriate. Students will be grouped by age.

Fall 2016 - Water Fall:

This fall's topic is water - from the physical properties of water to water through history, and everything in-between. We will focus on our dependency on water for hydration and inspiration and follow through with a look at water in the habitat, human impact and managing water. We expect an exciting **wet** fall!

Spring 2017 - Animalia Spring

In the spring, we jump into the animal kingdom with a look at different animal groups and how they fill a unique niche in the habitat. From population patterns and competition to food webs and habitat adaptations to basic survival needs, it will be a fascinating study. Come join the fun!
