

Phinizy Swamp Nature Park

Hi! I'm Izzy, and I'm a dragonfly. I live at Phinizy Swamp Nature Park. Since wetlands are a great environment for dragonflies, you can see a lot of us here during the warmer months. When we first hatch, we live in the water for up to two years. When we grow up, we live in the air. We don't walk very well, but once we take off, we love to fly! My big eyes help me hunt for bugs to eat. I think mosquitos are yummy! I am an important part of a healthy freshwater ecosystem.
